Invivyd Launches “Antibodies for Any Body” in Partnership with World Champion Skier Lindsey Vonn to Inspire Actions that Help Support Immune Health

April 7, 2026

- *National education campaign aims to educate Americans about antibodies and their role in immune health*
- *Campaign centerpiece, AntibodiesforAnyBody.com, offers an interactive immune health wellness assessment to empower people to better understand the relationship between their daily habits and immune health and wellness*

NEW HAVEN, Conn., April 07, 2026 (GLOBE NEWSWIRE) -- Invivyd, Inc. (Nasdaq: IVVD) today announced the launch of *Antibodies for Any Body*, a national education campaign designed to elevate public understanding of antibodies, one of the most important parts of the immune system, and their role in protecting against disease. The campaign launches in collaboration with renowned ski champion Lindsey Vonn, whose career has been defined by training with intention, overcoming challenges, and caring for her body from the inside out.

As part of the launch, Invivyd unveiled AntibodiesforAnyBody.com, a new online education resource offering clear, accessible information about immune health and how antibodies function as part of the body’s natural defense system. The site also includes the Antibodies for Any Body Wellness Assessment, an interactive learning tool designed to help individuals understand how certain lifestyle habits may help support their immune system, including antibody production and function.

“People want to feel more confident about their health – especially at a moment when prevention of infectious disease is of immense national interest,” said Marc Elia, Chairman of Invivyd’s Board of Directors. “Antibodies play a key role in the immune system, but many people may not be familiar with what they are or how everyday habits can influence their production and function. *Antibodies for Any Body* was created to bring clarity to the conversation in a way that is both accessible and empowering. Lindsey brings a rare combination of relatability, discipline, and authenticity, and we’re proud to have her as our partner as we elevate understanding of the links between immune health, antibodies, and wellness.”

Antibodies are protective proteins produced by the immune system. Their job is to recognize and help remove substances that do not belong in the body, such as germs or toxins. Common healthy habits – like getting enough sleep, proper nutrition, and regular physical activity – all ladder up to a healthy lifestyle, which supports immune function, including antibody protection.

“My entire career has been about understanding what my body needs to perform at its best – training hard, recovering smart, and paying attention to the things you can’t always see,” said Lindsey Vonn. “Over time, I've learned that real strength starts with how your body protects you from the inside. Antibodies play a big role in helping keep us healthy, and when you learn what they do and how they work, you may realize you have more control over your health than you might think. I partnered with Invivyd to help build the connection between antibodies and wellness and to show that anybody can take steps to optimize their immune system, including antibody protection.”

While the campaign partnership began before her recent crash and subsequent recovery journey, the core message of the initiative, empowering individuals to understand and support their immune health, remains central to Vonn’s wellness philosophy.

To learn more about how antibodies work and explore simple ways to support immune health, visit AntibodiesforAnyBody.com and take the interactive Antibodies for Any Body Wellness Assessment. Talk to your doctor about which healthy habits are right for you.
